

FEATURES OF UV-CURED DOMING

- Curing in a few minutes
- No clean room required
- Easy handling
- Program your own shapes also letters and complex figures
- Long lifetime of UV-lamps due to short curing time

ADVANTAGES OF BIO DOME

- Single component resin with integrated UV protection for indoor (e.g. keychains) and outdoor (e.g. cars)
- No mixing required
no waste – no cleaning – no complicated handling
- Environment responsible product – no irritations for human skin meeting future EU environmental laws
- REACH compliant – no solvent and no Isocyanate
- Low viscosity for highest production speed

ADDITIONAL ADVANTAGES OF HP-521

- High transparency during and after curing
- Optimized adhesion
- Very high scratch resistance
- Long outdoor durability
- High surface tension, material doesn't flow over media edge
- Larger Domings possible

POWER PLATE

Advantages

- Absolutely straightness of media
- Very good adhesion
- Water cleaning possible
- No media movement during curing
- Long term usability of plate

MANUAL SYSTEM LIGHT

System components

- UV oven UV420 for best curing
- Liquid container LC5 with 5 litre volume
- Hand dispenser MD2 with flexible quantity

Target customers

- Ideal starting system for small and medium quantities
- Always available
- Manual dispensing

PROFESSIONAL SYSTEM

System components

- UV oven UV420 for best curing
- Liquid container LC5 with 5 litre volume
- Hand dispenser AD3 with flexible quantity
- Automated dispenser ADC220 with foot pedal

Target customers

- Professional system for medium and large quantities
- Always available
- Automated quantity control
