OVERVIEW

Amethyst A50-RTR is a superior roll-to-roll UV curable ink. This flexible, fast curing UV ink is suitable for Mercury Vapour UV lamps and designed for self-adhesive as well as flexible media.

The A50-RTR performs well in a demanding, high speed printing environment, providing enhanced scuff and chemical resistance.

This formula is designed for compatibility across a broad range of print head models and features an excellent colour gamut for bright, vivid images.

Provided the inks are used in regular applications, using suitable substrates, the printed images will not fade unduly for up to 24 months.
