R10-HYB

FEATURES

- Designed for Rigid and Roll-to-Roll Applications
- Optimised for LED UV Lamps
- Excellent Media Adhesion
- Supported by NUtec Digital's Ink Delivery System (IDS) Warranty

OVERVIEW

Ruby R10-HYB is a general purpose Hybrid UV ink designed for rigid and roll-to-roll applications and is optimised for LED UV lamps.

Ruby R10-HYB ink exhibits impressive flexibility for roll-to-roll applications while also providing excellent adhesion on a wide variety of rigid substrates.

The R10-HYB is a hybrid ink that bridges the gap between rigid and roll-to-roll ink, providing the convenience of both in a single product.

The R10-HYB performs well in a demanding, high speed printing environment.

This formulation is designed for compatibility across a broad range of media types and features a superior colour gamut for brighter, more vivid images.

Provided the inks are used in regular applications, using suitable substrates, the printed images will last for up to 24 months.

PRINT HEAD COMPATIBILITY	Epson® DX4™, DX5™, DX6™, DX7™, I3200-U1™ & XP600™
PACKAGING CONFIGURATIONS	0.5L bottles; 220ml & 500ml cartridges
